Title:

Comments: I support the Pactola Mineral Withdrawal because it would protect the water of the indigenous Lakota peoples. The Black Hills are the traditional home of the Lakota, it's where they have their origin story. They have been the stewards of that land since time immemorial & should be allowed to continue. It's way past the time to start putting people over profits & start being good stewards of the earth, after all it's the only one we got. So in all good conscience I humbly implore you to do the right thing for all of us & not just the 1% & support this proposal.

Thank you,

F Haymond
