Title:

Comments: I would like to voice my opinion concerning mineral withdrawal around Pactola and along upper Rapid Creek. Project 63876.

I don't understand how a government agency put well over a 100,000 people at risk by allowing a for profit organization to ravage a pristine place of nature. These type of corporations have come into the Black Hills and destroyed the environment every time. They pack up and leave us with the mess. And then you and your staff move on to your next assignment, none the wiser. I want my clean water to stay that way
