Title:

Comments: I feel very strongly that the Forest Service should not interfere with prescribed burning in our Wilderness areas. Wilderness should never be impacted by human activity in any form - the whole premise of the Wilderness Act is to preserve and protect those lands and allow them to evolve in a natural manner. Therefore, ONLY allow lightening-caused fires should be occurring in Wilderness, not intentional man-made fires. I support Alternative C, the Wilderness Exclusion Alternative. The Forest Service should exclude all designated and recommended Wildernesses from its proposed cutting and burning plans for the Sequoia and Sierra National Forests in order to comply with the Wilderness Act. I also believe that the Forest Service should add the Moses Mountain Recommended Wilderness to Alternative C.
