Comments: I fully support the Pactola Reservoir-Rapid Creek Watershed Withdrawal. My priority for the Black Hills is safe, healthy water for people, plants, and animals. With Rapid City's population increasing, the need for reliable water is ever more important. We do not need another CERCLA site, for which we all pay dearly in both cleanup costs and loss of public resources. The US Forest Service was established to protect watersheds from damage. Please get back to that existential mission.
