Comments: I object to the construction of the high-voltage power lines across the Caja del Rio and onto the Pajarito Plateau, the LANLEPCU Project. Among my many other objections, it will only contribute to the continuing and absurd NUCLEAR ARMS RACE!! Those of us who value this land for its intended purpose, we want to protect it for its historical, cultural and environmental purpose, and we strongly object to the destruction of this area. To call it anything but "destruction" says that the agencies do not understand, or more accurately, do not care about the people's wishes and the future.
