Comments: I wholeheartedly support Alternative C, the Wilderness Exclusion Alternative, to the draft EA of the Sequoia and Sierra National Forests Prescribed Fire Project. Extensive burning does not belong in wilderness areas, which alternative C does protect. Instead, the Forest Service should allow natural, lightning-caused fire to play its ecological role in designated and recommended Wilderness on the Sequoia and Sierra National Forests. Another great addition would be for the Forest Service to include the Moses Mountain Recommended Wilderness in Alternative C. Wilderness should be "managed" the way it always has been, by nature. Thanks for listening.
