Title:

Comments: Dear Ladies and Gentleman,

I support alternative C, the wilderness exclusion.

In accordance with the Wilderness Act, the Forest Service's exclusion of all designated and recommended wilderness areas from logging and controlled burning Sequoia and Sierra National Forests should be rejected.

Further, the recommended Moses Mountain Wilderness should be included in Alternative C.

In all designated and recommended wilderness areas of the Sequoia and Sierra National Forests should rely on naturally occurring fire, such as lightning, to maintain ecological balance.

Kind regards

Juergen Teuschl
