Comments: i completely object to any more expansion on the forest service land that is leased to a billionaire resort corporation.our forest needs to remain natural and not to have human encroachment of any kind becoming normalized.i have been a resident of taos for many years, and have seen the many deceptions that choose money over nature.come on u.s .forest service, take care of our forests without the false delusion of of needing a corporation for human recreation.the airport expansion is just the tip of this recreational iceberg.please use the guidance of the taos pueblo who have been stewards and guardians of this land before any of these parties existed.thanks for your consideration
