Comments: I feel the need for change and assessment fail to specifically address how the 1990 forest plan is consistent with the 2012 planning rule. I think this is getting ridiculous. We have been sending in comments since about 2012 on this Forest Plan and it just keeps coming back up. The 1990 plan was supposed to be renewed every 15 years . That would mean we were supposed to have a new plan by 2005. There are lots of my friends who have died or are going to die before any plan is adopted. Even if we eventually get a new plan it won't be followed(just like the 1990 plan wasn't) I think the USFS needs to start managing the forest instead of trying to manage people. Hopefully the election that just concluded will be a great help to We The People!
