Title:

Comments: o The proposed Need for Change document does not meet our needs for access and recreation opportunities. Many other members of the public feel this way also.

o The proposed Need for Change document does not reflect our past substantive comments provided from 2010 to 2020 on what needs to be changed in the current management plans.

o The planning team need to hold meetings with the public and open the process to further comments in order to refine the Need for Change document that accurately meets the need for change of the communities.
