First name: Debra

Last name: Smith

Organization:

Title:

Comments: I believe the proposed changes are being made in order to get a plan on paper, regardless of the communities the changes will affect. We do not need less people in our forests. Locking up the forest will impact many people who have cherished going to the forest to recreate, provide for thier families and make a living for many generations. Please quit doing this process just to get the people out of the woods and expand the heavy force and regulation of the government.

Respectfully submitted.

Debra and Larry Smith
