Title:

Comments: I urge you to support Alternative C which is more in keeping with the Wilderness Act. I would like to see the Forest Service recognize that there should be limits as to how wilderness is managed. I urge you to not burn the Sequoia and Sierra National Forests as well as the Moses Mountain area. Wilderness has taken care of itself for centuries and should be allowed to continue doing that. I've hiked in many wild places and am so fortunate that they were natural and not manipulated in any way. Please do not burn these areas.

Sincerely,

Jeanie Scott
