Comments: Hello, I've been enjoying the SBNF as long as I can remember. I hike some, used to dirt bike. For about 30 years I've enjoyed traveling around the fire roads in my various 4x4s. I used to run 3N34 a couple times a month. Over the years I've been slowly saving and working on acquiring the proper vehicle with the right modifications to run 3N93.

It is a shame to think it would be taken away.

It's very sad to see what's happening to our forest.

From neglect of forest management not maintaining roads to their gutting of the OHV volunteer program to the failure to reopen 1N34 after the Grand Prix fire. Now this. I was concerned when we acquired the latest forest supervisor that she would manage by closure. It appears to be the case.

Arbitrarily closing huge areas is a ridiculous way to manage.

Not everyone can hike. Not everyone is capable. If you close this area I hope you improve the hiking trails and include wheelchair access.

Remember your the stewards of public land. We all have a right to access it.
