Title:

Comments: I object to the closing of the OHV trails in the plan. Riding areas shouldn't be closed without opening new riding areas to compensate. Especially prized single track like Redonda ridge. We should be expanding riding areas to encourage more enjoyment of our public lands not less. It seems that the forestry service is favoring one particular group of people over another. Let's focus the efforts of the forestry service on responsible use by all groups and not shut down much needed dual sport riding areas.
