Comments: Fencing has been a thorn in my side in the badlands and other places. I don't mind fencing that is within a reasonable height where wildlife can jump over AND where they provide more gates to allow hunters and other hikers to access/cross the landscape. Also they use BARBED fence, there needs to be communications with the Mule Deer Foundation to help make fences SAFE and crossable for both Humans and Wildlife. Without this collaboration, I feel that this should not go through.
