Comments: Maybe we should have less speakers and more action. OMG

I want to see more Goat Grazing for fuels abatement post fire no less than 12 months after a fire.

This is one way to keep brush from taking over. Also more Goat Grazing on WUI. Look at the fire damage you all are responsible for because you can't manage the fuels.

However when it takes 3 to 5 years or longer to do a NEPA there is no way your going to manage the forest.

Maybe sub out the NEPA process to a private firm and add performance standard / due date or they are not paid.

Maybe then we could get a NEPA in less than 12 Months.

OMG you all slow down the process down.

Look out Elon is coming.
