Last name: Kennedy

Organization:

Title:

Comments: I have previously submitted objections to the Buffalo Springs Restoration Project. Christopher Thornton is the responsible official for this project. His title is District Ranger of the Tell City Ranger District of the Hoosier National Forest Tell City District.

The connection between my current and past objections is that they are the same.

1. This project is rooted in old information which formed the last forest plan from 2006. Due to the horrendous effects of climate catastrophe, currently and in our future, the forest service plan is outdated and needs major updating. Trees are needed to store carbon, especially large trees.

2. This plan will destroy habitat for species that are suffering: box turtles and bats foremost.

My suggested remedy is to avoid any future logging, burning or extensive use of pesticides in the Hoosier National Forest.

I hope this objection satisfies your requirements and will be considered.

Sincerely,

Janet Kennedy
