Comments: Pursuant to my previous comment (which I still stand by):

I have been informed that there are alternate proposals being considered here. So, while I stand by the sentiment of my previous comment, I apologize for offering complaint without being prepared to offer solutions.

I am overwhelmingly in favor of Alternative C (less logging, more natural processes). We need to focus our environmental efforts on protecting, preserving, and expanding our forests. Widespread logging that lines the pockets of capitalists will never be the solution.
