Comments: I am happy to see that 3.57 of unpaved road are to be decommissioned. However, the plan also ADDS 3.75 new miles of road, so it is still a net increase in road. These are sensitive grasslands. It is a GOOD THING that there are no east-west roads that connect the two canyons. That area should NOT be traveled. I am very much against the creation of 3.75 new miles of road, even unpaved. Please do not do this.
