Title:

Comments: I'd like to go on record supporting the following high priority topics for forest restoration:

1. Please remove fire-killed and damaged trees along roadsides to avoid hazards and to salvage burned trees that are commercially viable
2. Reforest native tree species
3. Assure safety and upkeep of trees in campgrounds
4. Work with grazing committees and motorized vehicle proponents to minimize impact on the land and to assure burned areas have time to recover
