Title:

Comments: I am opposed to this action. It looks too extreme for the area. Very select thinning would be something I could get behind. It will take years for the landscape to return, with this plan.. The disruption of the wildlife corridors, will be devastating. Many endangered species reside there.

Please reconsider this project, and scale it back. This is something we, the people who live here will have to live with, after you move to a different job. We moved here for the forest and its wildlife.
