First name: Tad

Last name: Hershey

Organization: Colorado Motorcycle Trail Riders Association

Title:

Comments: Thank you for the information you provided today on the Lower North-South Vegetation Management Project within the Pike National Forest. Many members of our dirt bikeclub regularly ride in the proposed treatment area. As discussed, the availability of motorized single-track on the front range is very limited. Much of single-track trail #770 appears to be in the proposed treatment area, so naturally we are very interested in your plans. I look forward to reviewing the project presentation you mentioned. Also, thank you for connecting me to Ryan C. from the South Platte Ranger District so that we may be kept informed and provide input as the project progresses. Thanks again!
