Comments: The Beaver Canyon Recreation improvements Project. I understand what is needed for parking and it needs to be done, but at what cost to other user groups.

1. question is why you taking a trail that is part of the Paiute trail and making it into all machine and make the road unsafety to travel by double the traffic and making it so bigger machine can operate and making a hazard?
2. You keep taking our 50-inch trail and reduce the mileage. but not giving back to the user groups?
3. Has there been a traffic study?
4. Does this make all roads open to all machines?
5. Was State OHV funds used on these trails?
6. Why can you make all these new bike trails? but not add to the OHV group?
7. What wildlife is being impacted?
