Comments: I am in support of decommissioning the roads listed in the proposal, because this action will benefit wildlife and water quality. I am against improvement and construction of any new roads as proposed. There are many roads in the area already, and more traffic and construction will have a negative impact on many wildlife species and also will add silt to water runoff. BP agents speed on the gravel roads kicking up huge clouds of dust, which also has a negative impact as above. Agents don't have to have fast access to every point on the border. There is minimal migrant traffic in this area of the border and this does not warrant all this construction and disturbance. The rough terrain would make construction difficult and expensive, for no benefit. The negatives of this proposal far outweigh any benefit. All that to save a little driving time is not a good reason to destroy more land and habitat. Thank you.
