Comments: Thank you for accepting these comments on your wildfire mitigation efforts.

1. Please consider removing trees that have the greatest potential to fall and block access to roads, campgrounds, and trails.

- Many volunteers have worked on trail maintenance over the years and we'd love for them to stay clear.

2. Please consider erosion control in your recovery efforts.

- Erosion can impact streams, wildlife habitat, roads, and trails.

3. Please block off roads and trails that should remain or become non-motorized.

- Not that all motorized users are bad, but many are. They will take advantage of the situation and ride all over the place.

4. Try to replant using native tree varieties, and with varieties.

- A monoculture of trees is too susceptible to future disease and fire.
