Comments: I support the trail improvements. Use will increase as the population of the area does. Don't forget about equestrian use on the trails. I have used the trails during the summer and found parking to be limited.

Make the proposed trailhead parking improvements large enough for horse trailers to park and use the trails. Some separation of users promotes safety and prevents conflicts.

Line of sight on the trails is important for the various users to see each other before being too close to avoid a collision. The speed of the bikes is a safety concern for hikers and equestrians.
