Title:

Comments: I support plan A: Do nothing, basically gut this plan B and start over with a better long range maintenance plan including a plan to enhance camping opportunities. As it is now, those opportunities are very limited due to road closures in the area.

Provide more education with upgrading the two existing kiosks and with additional kiosks. And work with the local residents who know the area for input.

This area needs to be protected, this plan will further damage the area. The roads within the Coyote area need to be maintained. The lack of road maintenance in the INF has occurred for at least 25 years, it's a shame that the responsible agency can not maintain roads within their area of responsibility. We are willing to work with you, but you need to be a better partner. These partnerships are what we should really be getting more serious about. There's plenty of people out there willing to help keep roads open and maintained.
