Last name: Lacy

Organization:

Title:

Comments: I am very concerned you are considering increasing the harvest of mature trees on USFS lands. Your alt B would significantly increase logging at the expense of clean air (carbon sequestration), water resources and wildlife habitat. These forests belong to the people not just consumptive users. Please stay with alt B and do not increase the harvest levels of our forests. Thinning forests can contribute to larger wildfires as the wind will increase in those forests causing hotter fires. On addition our wildlife are diminishing due to climate change and we need to do more to protect their habitat.

Please select alt A

Craig Lacy
