Comments: public comment on lacy lemoos project as shown below 16,116 acres st joe ranger district with extended timefor comment

why dolocal communities get special benefits just because they are close in locality? this is discrimination since it is public land and all 335,000,000 citizens have a right to benefits from that land, not just extra benefits for those close. seee no reason for that inequality discrimination to be taking place forl00years. screw the east coast law is this called?

i feel the following is important to this site:

1. no hunting or trapping or killing wolves or animals by running over them with snowmobiles.

2. no new roads

3. no logging or grazing or mneral mining on this site r solar installaton.

4. no prescribed burning

protect this site for nature. that is what is important to this world. you up the temperature with all the logging and grazingyou allow. save the wild horses and burros on this land. they are few and should be protected for this country.
