First name: Ellen

Last name: Sassano

Organization: Pitkin County Community Development Dept.

Title:

Comments: Pitkin County is supportive of the ASWHIP changes proposed. This USFS project has been very successful in improving wildlife habitat around the area, with positive impacts to our local wildlife species and landscape health. The changes proposed continue to meet overall goals of wildlife habitat improvement via forest disturbance, using proven methods. The County believes the Forest Service has been adapting methods/locations appropriately since the project was initiated over ten years ago, and supports continued implementation of identified work.
