Comments: Dear Chris Welker,

I am writing to express my support of the Hassayampa Mineral Withdrawal. The Hassayampa River is a very special place to me personally. I have many fond memories of the area having whitewater kayaked sections of the river and spent many hours under the large willow trees. I have been able to see the beauty of a recovering ecosystem. It has taken 100 years to get here from the destruction of mineral hungry miners. It would be a shame to go back in time. This rivers protection is millions of times more valuable than any minerals found in its banks.

Best regards,

-Azra
