Title:

Comments: This is such an important issue for our community. I have lived here for over 30 years and understand how our beautiful landscapes help the town not only with necessary recreation but also help our economy. Protection is imperative . Our climate is changing and it is dryer and we need to make sure that we protect the water, and the habitat. We have just experienced a huge issue with the Senator mine and know that we can't protect our community unless we restrict mining to certain areas. The Hassayampa is a vital area for wildlife and recreation and feeds into the greater watershed in Pheonix . Please consider this withdrawal.

Best regards

Judy Sulltrop
