Comments: Thank you for taking my comments regarding the Hassayampa Mining Withdrawal. This withdrawal is very important in protecting the Hassayampa River Riparian Corridor located in my home area of Yavapai County, Arizona, from negative impacts compounded by mining, mineral, and geothermal leasing which leave extensive degradation on the river and the landscape generally. Further, habitat protection for native species will result from this Hassayampa River Mineral Withdrawal. Additional benefits from this Withdrawal include continued excellent recreational opportunities for Arizonans and travelers to the area. Our diligence today is essential for the preservation of these benefits now and for future generations. Thank you for your consideration and the work you do on behalf of all of us.
