Comments: Given the recent activities of the Senator Mine and Paradise Peak LLC, the Hassayampa Minerals Withdrawal is very much needed! I grew up within a mile or so of the Hassayampa and and still own the home and property where I was raised. I have personnally observed the effects of historic mining activity of that drainage system over many years while recreating and hunting. The proposed withdrawal protects the Hassayampa River from further mining encroachment which would be disastrous to the area and residents of the immediate communities/subdivisions and surrounding towns and cities. I support the withdrawal effort completely.
