Title:

Comments: My family and I have enjoyed living, camping and enjoying the vast forest lands in and around the Bradshaw Mountains and along the Hassayampa river basin for close to 7 decades. From swimming and playing in the creeks and swimming holes, even Hassayampa lake to the falls at lower wolf creek camp grounds.

We have respected the lands and trails even the old buildings that once stood to picking up other campers trash and even putting out campers unattended camp fires.

We learned early on from our parents to respect the land, water and animals in our forest lands.

If we do not respect and protect the land, animals and our drinking water now we very well may never get this chance again.

Please make a difference now Protect our Forest lands and Drinking water. Our Future depends it.

I am in Support of the Hassayampa River and Mineral Withdrawal.

Respectfully,

William Mitchell
Groom Creek Resident
