Comments: The Kootenai Valley Trout Unlimited chapter supports this project one hundred percent. This project , and others like it, are necessary to improve and enhance riparian areas and improve critical habitat for native coldwater species. In this case, bull trout and westslope cutthroat trout historically used the Vermillion River to spawn. Due to historical uses habitat has been comprised and this project will and is obviously determined to change things for the better.

Please permit this project and keep up the good work on the Vermillion River.
