Comments: The Proposed Action seems mostly good. I would like to propose 3 things to add:

1. The initial rollout of the "mandatory, but unlimited (no limit on the number of permits available) and free float permit across the system." to include the North Fork MU1 and MU2.

2. The reduction of outfitter guide permits on the Middle Fork Wild section to provide a more wild experience for users.

3. The reduction of outfitter guide permits on the South Fork Wild section to provide a more wild experience for users AND to analyze and reduce the number of "equipment drops" by outfitters on this section. I am unsure if these "drops" are categorized as outfitter river permit days, but they should contribute to that number as they greatly impact the # of users and shore impacts that river users create. Many parties pay for outfitters to drop full size front country rafting set up's on these "wild" stretches.
