Title:

Comments: I am one that has spent time in the Telephone Gab area and marveled at the Forest that is home to this area. I am begging you to cancel the Telephone Gab plan. I am begging you to work with scientists that use current science, not the old 2006 science that the Forest Service seems to be stuck in. Can you tell us why the FS cannot step into the current century to adopt better plans for climate emergency and our Forests? This is unforgivable. Thank you for listening and taking the proper direction!
