Title:

Comments: On behalf of all trees, this is a "no" to the Telephone Gap proposal #60192 to clearcut 11,000 + acres of forest.

We cannot afford to lose one more tree, to "proposed harvest treatments" for high-priced lumber and polymerization factories. The forest is not for sale.

At a time when the environment and trees are under seige, when there is talk of replacing real forests with GMO forests (Elana Freeland Geoengineered Transhumanism) and building Smart cities (see Bill Gates, Arizona land) when toxic chemical aerosol spraying at places like Mt. Ashland, OR have killed the forest off and strange "wildfires" have caused trees to burn from the inside out, we must be vigilant, awake and aware of the consequences of our actions.

We must consider how our actions affect the next 7 generations of people.

Trees are so hard-working. They are the lungs of the planet. The average tree provides enough oxygen for 2 people, shade in the summer, habitat for birds, animals, and insects, and they store significant carbon (hello global warming). They help with depression and anxiety and with respiratory problems in the very young and the elderly.

Older trees work even harder than young trees according to Peter Wohlleben, former forest ranger.

Thank you for the opportunity for a discourse. PLEASE DO NOT KILL THE TREES.
