Last name: Benton
Organization:
Title:
Comments: Please, stop the cutting of old growth forests. They are integral to the human connection with the earth that sustains us if we do not destroy it first. We need REAL forests, real space and real connection with that which is bigger than we are. The alternative is to just stay on our phones! What a horrible existence that would be. Old growth forests sustain a complex web of life that just can't be recreated.
