Comments: The Flathead system is an incredible resource that deserves more protection. I floated the S. Fork a couple years ago from Youngs to Mid Creek and the number of packrafts we encountered on the lower 1/2 was shocking. I'm afraid a permit system is the only way to protect this section. Campsites were very clean although knapweed was present. Tried to pull all I saw. We saw no large wildlife whatsoever. Mid-Creek takeout needs signage. Thank you.
