Comments: Please, please, please, NO LOGGING in the Telephone Gap project!! Our old forests are so rare and sparse already! This would be utterly destructive and the follow-on effects -- loss of biodiversity, degradation of the watershed, and the climate effects!? I am terrified of the climate change already underway, not to mention how much more harm we are causing every day. Please, no! Here in Vermont we know it's possible to rein in resource exploitation and protect the environment for so many, many beneficial reasons. Please STOP this logging project, and save the old forest - there is so little left. We'll never get it back once gone. This is insane in the age of climate change. These forests are our salvation. Please!?
