Comments: I emphatically object to the planned cutting of the Old Growth Forest in Telephone Gap. I live near this beautiful forest, walk among these giant trees, take in the fresh air that is enhanced and replenished by them.

I am appalled by the conclusions of the Forest Service that no Environmental Impact Statement will be presented to the public. This is an erroneous conclusion.

It is reprehensible that the health of the forest, the health of citizens, and definitely the health of the entire planet is being dismissed as some side issue. Climate change, the degradation of the earth, these are the over-arching issues of our time! The time is running out.

I am so sorry that the profit of the logging industry and the Forest Service's dependence on the income from cutting down our forests are the priority. THIS MUST STOP NOW!
