Title:

Comments: Vermont is danger because of all the trees being logged or cut! The soil is depleted, the roots are exposed, species are either at risk and /or eradicated and we are in deep shit! What kind of future are you trying to create because these actions are not creating a sustainable future!!!! Your actions are putting us all in harms way!!!! How are you able to breathe, where does your water come from, who makes your clothes and feeds your belly? Do you seriously think continually taking without asking or having respect or integrity wont hurt you or your descendants???
