Title:

Comments: Please do not proceed with the logging project in the Telephone Gap area of the Green mountain National Forest. It is an old growth Forest, which is more important now than ever and crucial to preserve, on relatively untouched private land, which is also more important than ever to preserve. Along with the simple moral obligation to protect old growth trees that we have, it is an essential habitat for endangered species, such as the Canadian Lynx, who already have a rapidly diminishing habitat. It is our sacred obligation to protect these lands and the species who call these lands their home. Please do not desecrate them by logging their home. It takes hundreds of years for these forests to reach the point t they are. It only takes a few months to destroy them. Please do not make this mistake, our Earth needs this land.

Thank you for reading this.

I have hope that the Forest Service will do the right thing and protect our forests.

Otherwise, what are we even doing here?
