Comments: hello, I'm afriad i don't have much time to write this, but I care deeply enough to try my best after a long shift at work. I demand that the logging plans for Telephone Gap be canceled. I am concerned about the short-sightedness of this plan. It seems to value a small amount of profit over the much more important impact that leaving forests alone has on climate change and biodiversity

We are in a Biodiversity crisis. Vermont has hardly any old growth forests left after European settlers clear cut 95% of the forests a little over a hundred years ago. (these numbers are from a VT fish and wildlife document). And the only way forests will become mature is to leave them be. Please, do not cut down the trees in telephone gap.
