Title:

Comments: Speaking in support limited use of ebikes on FS trails subject to two items.

1) Include an educational component to the permit system to ensure that all riders are fully informed of the requirements and limits. This should include permitted trails, safety rules, and any specific restrictions. These elements should be set to ensure, and aid, clear and appropriate enforcement as needed.

2) Ensure barricades and restrictions are clearly in place to ensure no riders enter Wilderness areas.
