Comments: E-bikes should NOT be allowed on non-motorized trails. Non-Motorized trails are for NON-Motorized use. All of the possible negatives that you bring up in your document WILL come true. They have in other areas. E-bikes are creating more and more problems already on regular bikeways. If someone cannot access these National Forest Trails in a non-motorized way then they should probably not be out in the forest. Why allow a motorized vehicle to wreck the experience for all other users?? What is the benefit, to the eco system, the wildlife, the vast majority of other users who use the trails. I have been hiking all of the trails mentioned in these documents for 50 years. These are places that allow you to easily access nature in a quiet and calm manner. E-bikers can access the Jackson Hole Mountain resort trails they have all of the bike paths to access where do the people go that what quick quiet access to the Forest trails go???? Please do not allow e-bikes on these Forest trails!!!
