First name: Keith
Last name: Haiar
Organization: Crook County Farm Bureau
Title: Director
Comments: The Crook County Farm Bureau Federation (CCFBF) appreciates the opportunity to comment on the North Sand Vegetation Management Project. CCFBF is a grassroots agricultural advocacy organization of over 450 members in Crook County, Wyoming. As such, we appreciate the need for pro-active management of our public landscapes. We fully support the project's objectives to reduce the probability and severity of wildfire, enhance big game habitat, and provide timber for our forestry industry. CCFBF advocates prudence in the project's application of prescribed fires due to the proximity of homes in the area. We look forward to the successful completion of this project.
