Comments: Once again (Are you not listening to the pure mtn biking community? We should be considered fathered in as long time users (I've been riding non-e-bike/motorcycle mechanized bikes here for 37 years!), this changes everything about my mountain biking experience on Teton Pass Trails - specifically The Arrow trail having e-bikes come up on me too fast and wearing the trail down/making ruts would be awful! - Also on Munger Mtn in July is our time to not have motorcycles and e-bikes - August is bad enough when we have motorcycles - (They need their own trails as they are very noisy/loud and too fast-also they destroy the Singletrack and rutt these trails down much faster- not sustainable) to the south of the current hike/mtn bike trails and also they could have their own trails (on Big Munger and other new trails that go up to the top of Munger Mtn or further to the south! Also, Thank You for taking cows off our mtn bike trails on Munger Mtn recently!
